Linear inductive displacement sensors

Sensor system with miniature sensor and on-board electronics KRS719(01)

Compact design
Calibrated system
On-board electronics

Model	KRS719(01)	
Article	4350026.01	
Measuring principle	LVDT (page 12)	
Measuring range	± 1 mm	
Target (included)	plunger 0800080 ($\varnothing 2 \times 62$ long) with thread M4x0.5 (15 mm long)	
Linearity	± 0.15 % FSO ($3 \mu\text{m}$)	
Resolution	0.07% FSO ($1.4 \mu\text{m}$)	
Frequency response	100 Hz (-3dB)	
Housing	nickel-plated steel	
Temperature stability	zero ± 50 ppm / $^{\circ}\text{C}$	
Output	4 ... 20 mA options: 2 ... 20 mA / ± 3.9 VDC	
Power supply	22.8 ... 25.2 VDC	
Temperature range	sensor	-20°C ... $+80^{\circ}\text{C}$
	electronics	0°C ... $+50^{\circ}\text{C}$
Adjustment	zero, gain	
Protection class	IP 67	
Electronics	incl. circuit board BSC719(02)-I, article 2208078.02	

FSO = Full Scale Output

The KRS719 sensor system is used for monitoring the yarn thickness in textile machines. The miniaturized sensor and the board-mounted electronics can be cost-effectively integrated into the available installation spaces and machine controllers. The system is characterized by high stability and repeatability.

* plunger in midrange

The plunger can be introduced into the sensor from both ends.

LVDT series: Displacement sensors with external electronics

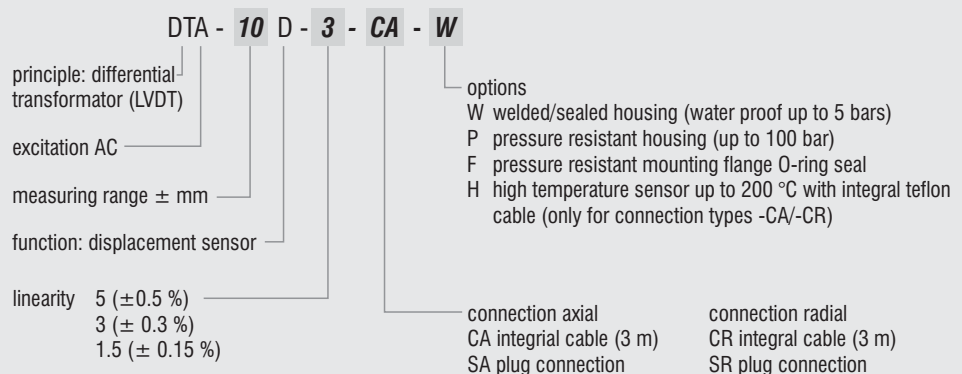

Displacement sensors have a plunger which moves freely in the sensor housing. The plunger is joined to the object by a thread to transfer the movement of the measurement object. The measurement process in the sensor takes place without contact and is therefore wear-free. The displacement sensors are mainly used to measure and monitor movements, displacements, positions, strokes, deflections, dislocations, etc. in vehicles, machines and systems.

The high sensor resolution is limited only by the noise in the sensor electronics. A further advantage of the symmetrically constructed sensors in the LVDT series is the zero-point stability of the systems. The sensors are supplied with an excitation frequency of 1 to 5 kHz depending on the measurement range and an excitation amplitude of 2.5 to 5 Vrms. Matched sensor electronics are available in this respect.

Measurement ranges $\pm 1 \dots \pm 25$ mm
Extremely accurate also under difficult ambient conditions
Long-term stability
Wear-free
Easy installation

With appropriate setting possibilities for the excitation frequency and amplitude, the sensors can also be operated with alternative electronics.

Miniature sensor with radial cable output DTA-0,8D-2,5-LR

OEM sensor for large-scale applications
Miniaturized design
Radial cable output
High accuracy

The miniature sensor DTA-0,8D-2,5-LR was designed and developed for use where the installation space is restricted. In addition, due to the low core weight the dynamic response of the measurement object is retained and mechanical loads are minimized.

Due to the radial cable output, the installation space behind the sensor can be fully exploited. With a linearity of $<0.25\%$ this sensor model is also suitable for measurements with high accuracy requirements.

Model	DTA-0,8D-2,5-LR
Article	2611045
Measuring principle	LVDT (page 12)
Measuring range	± 0.8 mm
Linearity	$<0.25\%$ FSO at $5 V_{\text{eff}} / 12.5$ kHz ($4 \mu\text{m}$)
Excitation frequency	1 - 20 kHz
Excitation amplitude	up to $10 V_{\text{eff}}$
Target (included)	core 0304028 ($\varnothing 2.7 \times 10.8$ long) with thread 1-72UNF (4 depth)
Housing	nickel-plated steel
Temperature stability sensor	zero: ± 50 ppm / $^{\circ}\text{C}$
Temperature range sensor	$-20^{\circ}\text{C} \dots +80^{\circ}\text{C}$
Protection class sensor	IP 65
Electronics	ISC7001

FSO = Full Scale Output

Miniature sensor with axial cable output DTA-1D-CA-U

OEM sensor for large-scale applications
Miniaturized design
Axial cable output

As the sensor DTA-0,8D-2,5-LR, the miniature sensor DTA-1D-CA-U was designed and developed especially for used in restricted installation space. Due to the low core weight, the measurement object dynamic response is retained and mechanical loads are minimized.

With this configuration the cable output is brought out axially so that the installation space surrounding the sensor can be fully exploited. This means, for example, that the sensor can be installed sunk into a hole.

Model	DTA-1D-CA-U
Article	2611037
Measuring principle	LVDT (page 12)
Measuring range	± 1 mm
Linearity	< 0.5 % FSO at $2.5 V_{\text{eff}} / 5$ kHz (0.01 mm)
Excitation frequency	1 - 20 kHz
Excitation amplitude	up to $10 V_{\text{eff}}$
Target (not included)	plunger 0800080 ($\varnothing 2 \times 62$ long) with thread M4 x 0.5 (15 long)
Sensitivity	155mV / Vmm at $2.5 V_{\text{eff}} / 5$ kHz
Housing	nickel-plated steel
Temperature stability sensor	zero: ± 50 ppm / °C
Temperature range sensor	- 20° C ... + 80° C
Protection class sensor	IP 67
Electronics	MSC710 ISC7001

FSO = Full Scale Output

Sensor with coated coil DTA-1D-20-DDV.02

Proven OEM sensor
Miniature design
Low cost sensor

Taking into account economic boundary conditions, with the sensor line DTA-1D-20-DDV the external, mechanical sensor housing has been omitted. To protect the measurement coils the sensor has been fully coated with a protective epoxy.

Model	DTA-1D-20-DDV.02
Article	2611011
Measuring principle	LVDT (page 12)
Measuring range	± 1 mm
Excitation frequency	0.5 ... 10 kHz
Excitation amplitude	up to $10 V_{\text{eff}}$
Target	customer specific
Linearity	$< 1\%$ FSO (0.02 mm)
Housing	protective epoxy
Temperature stability sensor	zero: ± 50 ppm / °C
Temperature range sensor	$-20^\circ \text{C} \dots + 85^\circ \text{C}$
Protection class sensor	IP 64
Electronics	MSC710
	ISC7001

Sensor for valve stroke measurements DTA-6D-20 (07)

Sensor for large-scale use for valve stroke measurements

Well-proven OEM sensor

Plastic housing

Due to the use of a plastic housing, the sensor DTA-6D-20(07) can be offered at a very reasonable price. The configuration of the sensor facilitates, depending on the plunger used, a useful measurement range of ± 2 mm to ± 8 mm.

In a typical application this sensor is used for the measurement of the piston position in hydraulic valves. To facilitate exact dosage and therefore also a controlled movement, displacement sensors of the product line DTA-6D-20 are integrated into these valves.

The sensors acquire the position of the control plunger, controlling the volume flow. To do this, an accurate, non-contacting and primarily dynamic position acquisition is required. The sensor is mounted here outside of the pressurized area on a pressure pipe.

Model	DTA-6D-20(07)
Article	2611043
Measuring principle	LVDT (page 12)
Measuring range	$\pm 2 \dots \pm 8$ mm
Linearity	< 0.5 % FSO at $2.5 V_{\text{eff}} / 5 \text{ kHz}^*$
Frequency	1 - 20 kHz
Input voltage	up to $10 V_{\text{eff}}$
Target (not included)	core 0304034 ($\varnothing 2 \times 28$) pressure tube 0483331 ($\varnothing 5 \times 0.2$)
Housing	plastics
Temperature stability sensor	zero: ± 50 ppm / $^{\circ}\text{C}$
Operating temperature sensor	$-20^{\circ}\text{C} \dots + 80^{\circ}\text{C}$
Protection class sensor	IP 67
Electronics	MSC710 ISC7001

Pressure resistant sensor with welded flange DTA-15D-5-CA-(03)

Pressure resistant version
Laser-welded stainless steel housing
Integrated flange
External electronics

For displacement measurements in applications with a very high ambient pressure, sensors of the series LVDT are integrated into a laser-welded, pressure resistant housing with an O-ring seal. The integrated flange facilitates simple sensor mounting.

Model	DTA-15D-5-CA-(03)
Article	2607026.03
Measuring principle	LVDT (page 12)
Measuring range	± 15 mm
Linearity	± 0.5 % FSO
Excitation frequency	1 kHz
Excitation amplitude	2.5 V _{eff}
Target (not included)	plunger 0800062 ($\varnothing 4$ mm, 108 mm long) thread M4 (20 mm long)
Housing	stainless steel
Temperature stability sensor	zero: ± 50 ppm / °C
Temperature range sensor	-20° C ... + 85° C
Pressure resistance	150 bar
Electronics	MSC710
	ISC7001

FSO = Full Scale Output

Half-bridge sensor with plastic housing DRA-25D-20-SR-02

Plastic housing
Integrated Rast 2.5 plug
Extrusion coated core

The displacement sensor DRA-25D-20-SR(02) has been derived from the well-proven large-scale applications system for loading and unbalance detection in washing machines. The sensor is particularly well suited for applications in which displacements of up to 50 mm must be acquired economically and reliably. The sensor is integrated and protected within the machine or equipment. The integral 3-pole plug corresponds to the standardized Rast 2.5 dimensions.

Model	DRA-25D-20-SR
Article	2611031
Measuring principle	half-bridge
Measuring range	50 mm (± 25 mm)
Linearity	± 1 % FSO (0.5 mm)
Excitation frequency	500 Hz
Excitation amplitude	5 V _{eff}
Target (not included)	plunger 0800077 ($\varnothing 4.76 \times 98$ long) with inner thread M2.5 (6 depth)
Housing	plastic
Temperature stability sensor	± 0.01 % / °C (core in midrange)
Temperature range sensor	-20° C ... +70° C
Protection class sensor	IP 40
Electronics	MSC7210
	ISC7001

MSC710 sensor controller for LVDT series

Excellent linearity and resolution
Zero and gain adjustable coarse/fine
Excitation frequency 1 ... 10 kHz (selectable)
Compact and robust EMI-proofed housing

The MSC710 is a single-channel miniature sensor controller for the operation of inductive displacement sensors based on the LVDT principle (Linear Variable Differential Transformer). Its compact, but rugged design, makes it suitable for both industrial and laboratory applications. Easily accessible and simple to operate, by using DIP-switches. The electronic unit can be matched to a wide range of sensors.

Model		MSC710-U	MSC710-I
Power supply		18 ... 30 VDC (18 ... 45 mA)	
Protection		Reverse polarity protection, overvoltage protection	
Sensor principle		for LVDT sensors	
Sensor excitation		150 ... 400 mV	
		1/2/5 kHz (selectable by DIP-switches)	
Input impedance	sensor	10 kOhm	
Range	gain	-20 ... +350 % (trimpot)	
	zero	±50 % (trimpot)	
Output signal		2 ... 10 VDC ($R_a > 1$ kOhm)	4 ... 20 mA (load <500 Ohm)
Noise		< 1.5 mV _{eff} *	< 3 μA _{eff} *
		< 15 mV _{ss}	< 30 μA _{ss}
Linearity		<0.02 % FSO	
Frequency response		300 Hz (-3dB)	
Temperature range	storage	-40 °C ... +85 °C	
	operating	0 °C ... +70 °C	
Temperature stability		±100 ppm / °C	
Protection class		IP 65	
Weight		80 g	
Housing material		ABS-plastic	
Electromagnetic compatibility (EMC)		EN 50081-2 (spurious emission)	
		EN 50082-2 (immunity to interference)	
Vibration		EN 60068-2-64 (noise)	
Shock		EN 60068-2-29 (continuous shock)
