Dytran Model 3077A

The Dytran model 3077A is an IEPE piezoelectric accelerometer, designed expressly for Rotor, Track and Balance (RTB) and other high-frequency aircraft vibration monitoring applications.

Offering a sensitivity of 10 mV/g, frequency response of 1.5 to 5,000 Hz, and a 3-foot integral cable, the distinguishing feature of model 3077A is the Dytran developed integral mounting bracket design, facilitating improved sensor performance while eliminating costs associated with separate mounting brackets. The miniature accelerometer is mounted within the bracket at the point where the cable and bracket are joined. It also offers reduced mass, as compared to conventional sensors and mounting brackets. Dytran's model 3077A is hermetically sealed for reliable operation within high-humidity and dirty environments as well as case isolated, to avoid EMI/ground loop interference.

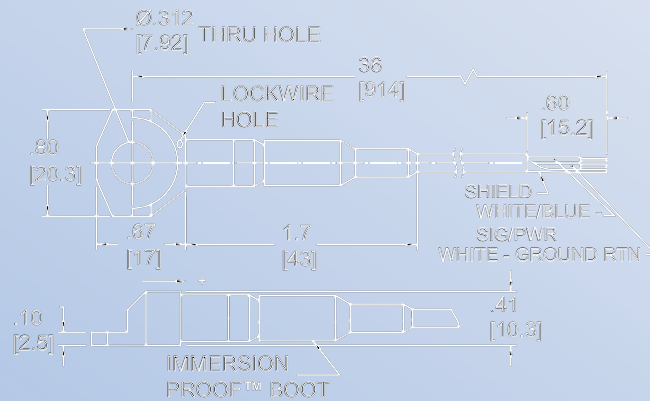

Features

- Integral mounting bracket
- Multiple sense directions available
- Eliminates need for separate mounting bracket
- Integral cable
- Case isolated
- IEPE

Applications

- Health and Usage Monitoring Systems (HUMS)
- Rotor, Track and Balance (RTB)
- Transmission vibration measurements

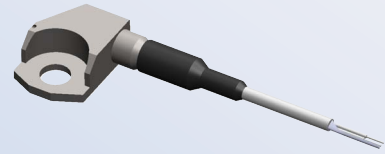

Note: All dimensions are in inches (millimeters).

Specifications	Units	3077A
Weight	oz (gm)	0.39 (11)
Housing		stainless steel
Sensing Element		quartz, shear
Sensitivity	mV/g (mV/m/s ²)	10 (1)
Range	g (m/s ²)	500 (4,903)
Frequency Response, ±10%	Hz	1.5 to 5,000
Spectral Noise	see appendix	B
Electrical Isolation		yes
Maximum Shock	g (m/s ²)	3,000 (29,420)
Temperature Range	°F (°C)	-60 to +250 (-51 to +121)
Thermal Coefficient of Sensitivity	%/°F (%/°C)	0.03 (0.06)
Environmental Seal		hermetic
Recommended Accessories		
Mounting	One (1) model 6555A (Ø.250 thru hole) and one (1) model 6555A1 (Ø.188 thru hole) adaptor bushings (supplied)	
Cabling	Integral 3-foot cable assembly (supplied)	

Dytran Model 3078A

Expressly designed for use in Health and Usage Monitoring Systems (HUMS), the Dytran model 3078A is an IEPE piezoelectric accelerometer, featuring a sensitivity of 10 mV/g with a frequency response of 1.5 to 5,000 Hz in a highly rugged stainless steel package weighing 20 grams.

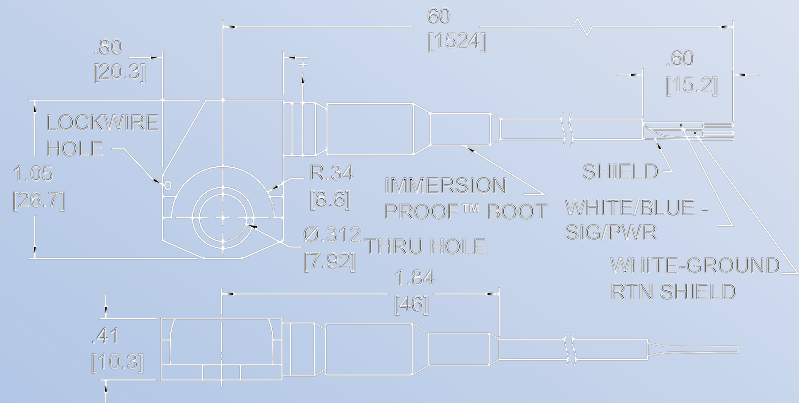

The distinguishing feature of model 3078A is the Dytran developed integral mounting bracket design, facilitating improved sensor performance while eliminating costs associated with separate mounting brackets. The miniature accelerometer is mounted within the bracket at the point where the cable and bracket are joined. It also offers reduced mass, as compared to conventional sensors and mounting brackets. Model 3078A is hermetically sealed for reliable operation within high-humidity and dirty environments as well as case isolated, to avoid EMI/ground loop interference.

Features

- Integral mounting bracket
- Multiple sense directions available
- Eliminates need for separate mounting bracket
- Integral cable
- Case isolated
- IEPE

Applications

- High-frequency aircraft/airframe vibration measurements
- Health and Usage Monitoring Systems (HUMS)
- Rotor, Track and Balance (RTB)
- Transmission vibration measurements

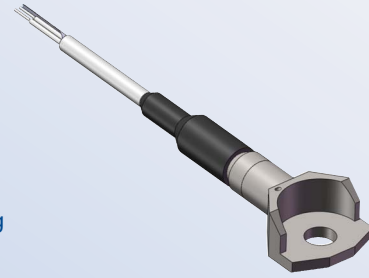

Note: All dimensions are in inches (millimeters).

Specifications	Units	3078A

Recommended Accessories		
Mounting	One (1) model 6555A (Ø.250 thru hole) and one (1) model 6555A1 (Ø.188 thru hole) adaptor bushings (supplied)	
Cabling	Integral 5-foot cable assembly (supplied))	

Dytran Model 3079A

Designed expressly for Health and Usage Monitoring Systems (HUMS), the Dytran model 3079A is an IEPE piezoelectric accelerometer, featuring a sensitivity of 10 mV/g with a frequency response of 1.5 to 5,000 Hz in a highly rugged stainless steel package weighing 11 grams.

The distinguishing feature of model 3079A is the Dytran developed integral mounting bracket design, facilitating improved sensor performance while eliminating costs associated with separate mounting brackets. The miniature accelerometer is mounted within the bracket at the point where the cable and bracket are joined. This unique design also offers a reduced mass, as compared to conventional sensors and mounting brackets. Model 3079A is hermetically sealed for reliable operation within high-humidity and dirty environments as well as case isolated, to avoid ground loop interference.

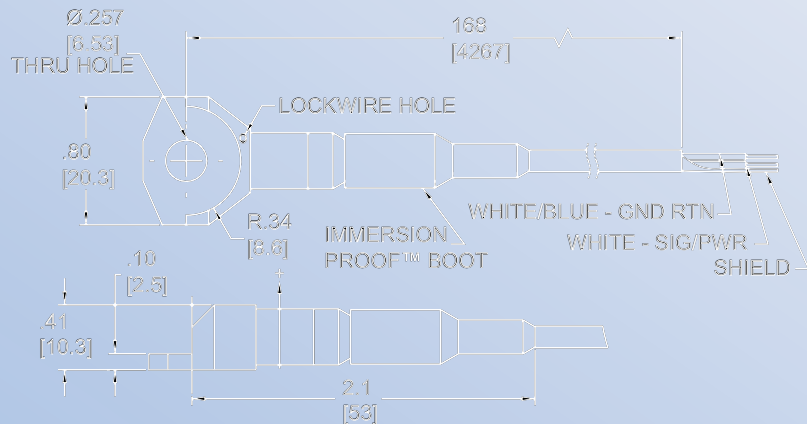

Features

- Integral mounting bracket
- Multiple sense directions available
- Eliminates need for separate mounting bracket
- Integral cable
- Case Isolated
- IEPE

Applications

- High-frequency aircraft/airframe vibration measurements
- Health and Usage Monitoring Systems (HUMS)
- Rotor, Track and Balance (RTB)
- Transmission vibration measurements

Note: All dimensions are in inches (millimeters).
