

# More Precision.

## **scanCONTROL**

2D/3D laser scanner (laser profile sensors)

### Precise laser scanner for high speed profile acquisition

scanCONTROL 2800 / 2810 consists of a compact sensor and an intelligent controller, which are connected by a cable. The controller outputs both the 2D profile information as well as analysed data.

scanCONTROL has been developed for industrial applications. Using innovative technologies significantly increases the functionality of the system and its flexibility for different applications.

Unlike conventional systems, the scanCONTROL 2800/2810 is not limited to specific applications and is therefore ideal suited for a large variety of industrial fields. The integrated FireWire interface enables both complete control for several scanCONTROL systems via a PC, as well as high data rates.

### High measuring rate

Fast quality measurement is guaranteed by the high measuring rate of up to 256,000 measuring points per second. A profile frequency of up to 4,000 profiles per second can be achieved, depending on the resolution and measuring range.

### Profile resolution scanCONTROL 2800/2810

A profile consists of a maximum of 1024 points with each point having a calibrated x and z coordinate. These points are acquired simultaneously across the entire line and output as a 2D line for real-time evaluation of the profile.

- z-axis measuring range up to 245mm
- x-axis measuring range up to 140mm
- Profile frequency up to 4,000Hz
- Measuring rate up to 256,000 points per second
- z-axis reference resolution <math><2\mu\text{m}</math>
- Resolution x-axis up to 1,024 points

### scanCONTROL 2800

The scanCONTROL 2800 sensors are the industrial standard sensors for high resolution and fast applications. The sensor provides a profile frequency of up to 4,000Hz and 256,000 measuring points per second.

### scanCONTROL 2810

The SMART series scanCONTROL 2810 offers a Plug & Play solution with integrated controller for simple measurement tasks and profile analysis. The sensor design is identical to the 2800 series.

## HIGHSPEED: Calibrated profile data

The scanCONTROL 2800 models are used for the transfer of calibrated profile data for external profile analysis, for example in a PC. The profile information is also transferred via the same interface. Details of the software interface can be found in the „Integrating scanCONTROL in application software“ chapter.

### HIGH-SPEED

scanCONTROL 2800-10

scanCONTROL 2800-25

scanCONTROL 2800-100

#### Scope of delivery:

Sensor, controller, power supply cable 3m, FireWire cable 3m, sensor protocol, Demo CD incl. SDK

## SMART: Profile analysis

The SMART series scanCONTROL 2810 offers a Plug & Play solution within the integrated controller for simple measurement tasks such as step, angle, seam and groove inspection. The sensor is programmed via a PC using the scanCONTROL Configuration Tools. This setup is stored inside the controller. The sensor can run in the standalone mode without a PC. In addition to the measurement output via RS422, switch outputs and analogue measuring values are available.

The RS422 can be programmed as a serial interface (measurement value output).

### SMART

scanCONTROL 2810-10

scanCONTROL 2810-25

scanCONTROL 2810-100

#### Scope of delivery:

Sensor, controller, power supply cable 3m, FireWire cable 3m, sensor protocol, Software Configuration Tools

Model		scanCONTROL	HIGHSPEED 2800-10	SMART 2810-10

## Cables and accessories

### Connecting cables, qualified for drag chain use

<i>Part.-No.</i>	<i>Model</i>	<i>Description</i>
2901146	CE2800-3-SB	Extension cable for sensor, 3m (female-male)
2901146.01	CE2800-3-SS	Connection cable for sensor, 3m (male-male)
2901219	CE2800-5-SB	Extension cable for sensor, 5m (female-male)
2901219.01	CE2800-5-SS	Connection cable for sensor, 4.75m (male-male)
2901147	CE2800-8-SB	Extension cable for sensor, 8m (female-male)
2901228	CE2800-8-SS	Connection cable for sensor, 7.75m (male-male)
2901167	CE2800-10-SS	Connection cable for sensor, 9.75m (male-male)

### Connecting cables, qualified for robotic use

<i>Part.-No.</i>	<i>Model</i>	<i>Description</i>
2901202	CER2800-5-SS	Connection cable for sensor, 4.75m (male-male)
2901222	CER2800-8-SB	Extension cable for sensor, 8m (female-male)
2901229	CER2800-8-SS	Connection cable for sensor, 7.75m (male-male)
2901164	CER2800-10-SS	Connection cable for sensor, 9.75m (male-male)

### Other cables

<i>Part.-No.</i>	<i>Model</i>	<i>Description</i>
2901145	PC2800-3	Power supply cable, 3m
2901159	SCD-IEEE-1394-3	FireWire cable, 3m
2901150	SC2800-0,5	Synchronisation cable, 0.5m suitable for controller LLT2800 and LLT2810

### Accessories

<i>Part.-No.</i>	<i>Model</i>	<i>Description</i>
2420062	PS2020	Power supply 24 V/2.5A
8360006	3D-View	scanCONTROL 3D-View software

## High performance sensors made by Micro-Epsilon

Sensors and systems for displacement and position

Measurement and inspection systems for quality assurance

Sensors and measurement devices for non-contact temperature measurement

Optical micrometers, fibre optic sensors and fibre optics

2D/3D profile sensors (laser scanner)

Colour recognition sensors, LED analyzers and colour online spectrometer
